

ATC MLC Tuning Stick Kits: ATC Tuning Sticks® allow you to easily select the right capacitance value for your circuit without soldering capacitors. A Tuning Stick® consists of an ATC 100 Series A or B case and 600 Series S or F case capacitor permanently attached to a non-conductive holder. The Stick material has been selected so that its effect on the capacitance value and Q is minimal. Tuning Sticks® are available off the shelf through QUIK-PICK® RoHS Compliant Products.

Kit #	RoHS	Item #	Description	Cap. Value Range (pF)	Cap. Values (pF) Tol.
