

HD74LS151

1-of-8 Data Selector / Multiplexer (with strobe)

REJ03D0497-0300

Rev.3.00

May 10, 2006

This data selector / multiplexer contains full-on chip binary decoding to select the desired data source. The HD74LS151 selects one-of-eight data sources and has a strove input, which must be at a low logic level to enable this device. A high level at the strove forces the W output high, and the Y output low.
