

SCSI Single-end Terminator

Active terminators include a voltage regulator circuit to compensate for fluctuations in the host adapter

DESCRIPTION

Tripp Lite's single ended C50 active terminator is the one for all of your external SCSI applications. Used at the end of an external SCSI chain with SCSI devices which have a C50 female port. Tripp Lite's active terminators provide the clearest data signal maximizing signal integrity. Supports fast and ultra single ended devices at 10 or 20 Mbps. Active terminators have a voltage regulator circuit to compensate for fluctuations in the host adapter. Tripp Lite warrants this product to be free from defects in materials and workmanship for life.

KEY BUYING POINTS

- Active external SCSI terminator C50M single ended. Tripp Lite active terminators include a voltage regulator circuit to compensate for fluctuations in the host adapter
