+ Duracell is a world leader in portable power solutions.  
Duracell Nickel-Metal Hydride (Ni-MH) Rechargeable Batteries are one of the most advanced rechargeable battery systems commercially available offering up to 40 percent longer service life\*.

Ni-MH rechargeable batteries are also an environmentally friendlier alternative to nickel-cadmium (Ni-Cd) batteries.

Duracell Ni-MH rechargeable batteries can charge up to 1000 cycles and hence are long lasting and great value.

\*Compared with Ni-Cd chemistry

Max. Height: 5.33

Primary Usage: Hearing Aids

Introducing Duracell Hearing Aid batteries with EASYTAB™ – the world's first easy to use hearing aid batteries.

New EASYTAB makes changing hearing aid batteries as easy as 1-2-3.

- Easy to open package
- Easy to remove the batteries
- Easy to insert the battery into your hearing device

Why is it easy?

The whole EASYTAB experience starts with the new package – it is easier to open, compact, discreet and totally protects your batteries until you need them. Each features EASYTAB, a tab that is longer than the tab on ordinary hearing aid batteries making it easier to remove from the pack, handle and insert into your hearing aid. EASYTAB is also easy to locate if you drop the battery on the floor (particularly thick carpet). Once the battery is inserted into your hearing aid, simply peel off EASYTAB – you can now change your batteries anywhere.

- + Reliability. That's why more and more people count on Duracell hearing aid batteries.

# Duracell Torches
