

EMC Filters for AC Power Line

Conformity to RoHS Directive

For Triple-phase, Large-size Box Cased ZRGT-M Series

FEATURES

- The ZRGT-M series EMC filters are highly effective at preventing both the radiation and penetration of EMC noise. The parts are, therefore, highly immune to externally generated noise and do not, themselves, serve as sources of radiated noise.
- For the CISPR frequency band, this product provides superior attenuation for both differential mode and common mode noise components.
- Withstand voltage is AC.1250V between the lines and AC.2000V between line and ground.
- Single-direction block terminal design simplifies wiring requirements, thereby improving workflow.
- Leakage current is maintained at less than 1mA.
- It is a product conforming to RoHS directive.

• Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

• All specifications are subject to change without notice.

CAUTIONS

- When there is a danger of a high energy pulse voltage (over 2kV for over 1 μ s), use a surge absorbing element such as a varistor, or arrester on the EMC filter power supply input side.
